

The User Friendly Manual Pool Vacuum

HAMMER-HEAD

Manual Pool Vacuum

- 🔵 The battery powered Hammer-Head is a totally self-contained manual vacuum
- 🔵 The popular commercial model has a 750mm wide head, ideal for public pools
- 🔵 All the hassles and dangers associated with conventional pumps, vacuum hoses, extension cords, power outlets etc. are now a thing of the past
- 🔵 Set-up is quick and simple. Wheel out the Hammer-Head, attach the pole, place the Hammer-Head in the pool, turn it on and you're immediately cleaning. Your set-up time is literally seconds
- 🔵 The Hammer-Head's large capacity filter bag makes debris collection a breeze. It is self-contained and easy to clean and comes in standard or superfine grades
- 🔵 The Hammer-Head has a factory sealed marine motor and pumps an astounding 1000 L/min, vacuuming up almost anything including sticks, leaves, sand and even coins
- 🔵 It comes with an 18m tough flotation cord
- 🔵 It has a stainless steel pole swivel
- 🔵 The Hammer-Head is safe for vinyl pool liners
- 🔵 It comes with its own powder coated caddy cart with large diameter non-marking solid airless wheels allowing easy handling to and from the pool, up and down stairs and into small storage areas. It can transport everything you need in one trip
- 🔵 It has a large marine battery box and a weatherproof marine switch

SPECIFICATIONS

Suction rate	1000 L/min
Motor unit voltage	12V DC
Cable Length	18m
Filtration	Standard and Superfine heavy mesh filter bags
12V battery operated	No power outlets or extension cords needed
Weight of head and cord	12.5kg
Powder coated caddy	Included
Warranty	12 months
Head width	750mm
Battery and Pole	Not included

Outboard wheels keep the vacuum mouth unobstructed, while protecting the head.

Twist the pole and the vacuum head responds by turning left or right.

The vacuum head rocks back when you push forward and forward when you pull back, concentrating the suction where it's needed most.
